

AI-Native Full Stack Developer | Machine Learning Enthusiast

AI-focused Computer Science undergraduate with hands-on experience in machine learning, full-stack development, and building intelligent applications. Skilled in designing data-driven solutions, optimising model performance, and developing scalable systems using modern technologies. Familiar with AI-native concepts, including LLM integration, prompt engineering, and intelligent workflows. Built and contributed to AI-driven applications addressing practical use cases in real-world systems.

Experience

AI & ML Developer | ShadowFox (March 2025)

- Designed and optimised machine learning models for image tagging, achieving **92% accuracy** on a dataset of **5,000+ images**, improving classification reliability
- Performed data preprocessing, feature engineering, and cross-validation on **10K+ data samples**, improving model generalisation by **20%**
- Evaluated model performance using statistical metrics, reducing data processing time by **30%** through optimised pipeline design
- Contributed to building scalable ML workflows handling **multiple experimental pipelines**, improving training efficiency and reproducibility by **25%**

Associate Technical Developer | CITS (Sep 2025 – Dec 2025)

- Conducted a **2-week Flutter bootcamp for 250+ students**, improving post-training assessment scores by **40%**
 - Led a **4-member full-stack development team** to build a Learning Management System (LMS) website serving **200+ users**
 - Contributed to frontend development, ensuring **cross-platform compatibility across web and mobile devices**
 - Presented **3+ technical project demos**, effectively communicating system design, workflows, and outcomes to peers and mentors
-

Projects

Adaptive Learning AI (Zyvora)

- Developed an AI-based adaptive learning system analysing **1,000+ user interactions** to personalise content delivery
- Designed recommendation-style workflows, improving user engagement by **45%**
- Integrated speech-to-text and text-to-speech modules supporting **multimodal learning interaction flow**
- Built scalable AI-driven architecture capable of handling **real-time user input processing (<1s response latency)**

Real-Time Web Chat Application (TEAM)

- Built a real-time chat application supporting **100+ concurrent users** using Socket.IO and REST APIs
- Implemented JWT and bcrypt-based authentication, reducing unauthorised access risks by **~90%**
- Optimised backend communication flow, reducing message delivery latency by **35%**
- Designed system architecture supporting **real-time bidirectional communication with low-latency messaging (<200ms avg)**

Learning Management System (LMS) Website

- Developed a full-stack LMS platform supporting **200+ users** for course management and content access
- Designed RESTful APIs, improving system scalability and modularity across **5+ core modules**
- Reduced server response time by **25%** through backend optimisation and efficient database querying
- Improved system throughput for concurrent requests by **~30%** using optimised architecture design

AI Document Q&A System

- Built a document-based question answering system using embeddings and RAG concepts, processing **large text datasets (50+ documents)**
 - Designed a retrieval pipeline improving response relevance and accuracy by **~20–25%**
 - Implemented a prompt-based generation system producing structured outputs for improved response consistency
 - Reduced manual search time for document queries by **~60%** through an automated retrieval system
-

Education

CMR Engineering College | CGPA - 8.1
TMR-JC Balanagar Boys-1 | CGPA - 8.9
TMREIS Balanagar Boys-1 | CGPA - 10

Bachelor of Technology (CSE- AI&ML) | 2022 – 2026 (Expected)
Intermediate (MPC) | 2020 - 2022
Secondary School Certificate (SCC) | 2016 - 2020

Technical Skills

Programming: Python, Java, C++, JavaScript, SQL

Full Stack Development: React, Node.js, Express.js, REST APIs

AI & Machine Learning: Model training, feature engineering, data preprocessing, model evaluation

AI & LLM Concepts: Prompt Engineering, RAG, AI-assisted development

Databases: MongoDB, MySQL

LLM Tools: OpenAI API, Gemini API

Tools: Git, GitHub
